Ring Pump®

“Fixed Flow Rate” Pump System

RE-C300-HC Series

Features

- This is a metering pump system that combines an Aquatech’s ring pump using an encoder-equipped DC motor and its dedicated motor controller “RE-C300” to achieve metering by stopping the motor rotation at an exact integer multiple of one rotation.
- Pump head is replaceable and the docking of pump head can be done in a single action. No screw bolt needed
- Pump head can be sterilized.
 - Autoclave 121 degree C, 25 min. (all tubings except Transmaster TM-15)
 - Gamma rays 25kGy
- You can select tubing from 4 kinds of materials.

Main specifications

Flow rate	Max. 7mL / 0.2mL - Step
Tubing	Silicone / PharMed BPT Versilon F-5500-A / Transmaster TM-15
Motor/Power source	Encoder-equipped DC motor /24V
Weight (for reference)	Approx. 355g

Examples of application

Analytical instruments, medical devices, cell culturing experiments and many other usage where micro-fluidic control is needed.

Install the dedicated software saved on the provided USB memory stick on your computer.
By connecting the PC and dedicated motor controller “RE-C300” with the included USB cable, various operations of the pump become available.
Various pump operation sequences can also be programmed.
