## RE-V100

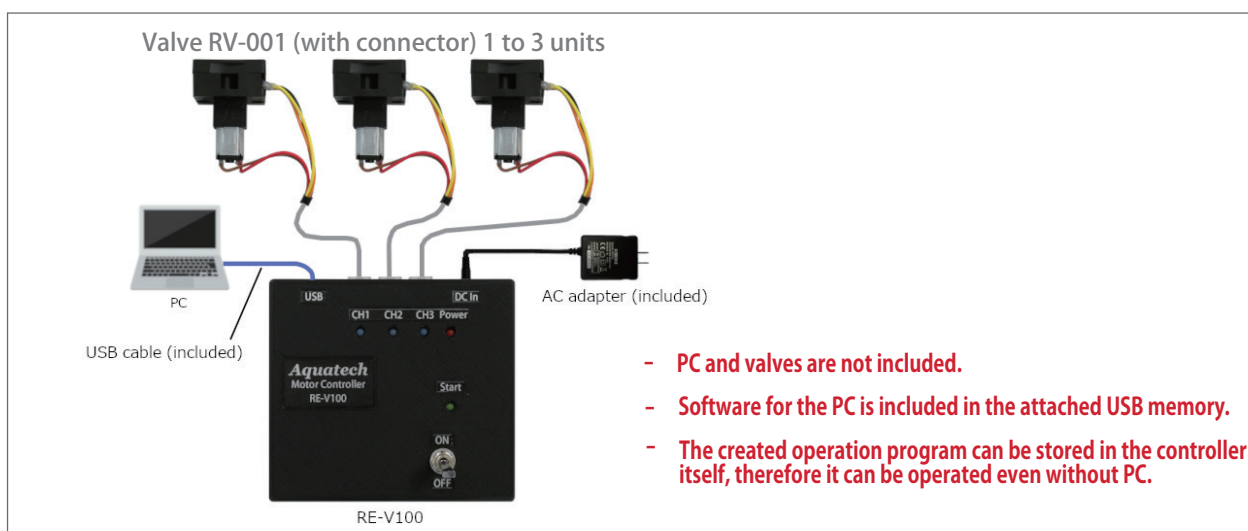

### Dedicated programmable motor controller for RV-001 series Pinch valve

#### Features

- Dedicated motor controller for RV-001 series pinch valve.
- Up to three valves can be connected and each valve can be programmed to open and close at separate times.
- Connect to a Windows PC and input the operating program.
- The created operation program can be stored in the controller itself, therefore it can be operated without PC.
- The created operation programs can be saved on your PC and reused.
- The valve and controller are connected with a connector. To use the controller, a valve with connector is required.

#### Connection

#### Main specifications
